Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-9 and 11-33 are rejected under 35 U.S.C. 102(e) as being anticipated by Sharma et al. (2006/0168095).
3. Sharma teaches a method and system (abstract) of content protocol translation (Paras. 1-29 and 208) via proxies between data storage devices and mobile devices, wherein the proxy links to a protocol engine (Paras. 30-33, 85) to convert between conventional internet protocols and XML-type protocols (Paras. 33-37), via template form (Appendix B), thus rendering the pages appropriately (Paras. 38, 58, 112).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Sharma as applied to claims 1, 8, 9 above, and further in view of Hind et al. (7,194,683).

Art Unit: 2145

6. . Sharma does not expressly disclose an XSLT engine. Hind teaches a method and system (abstract) of protocol conversion systems (col. 1, line 1 – col. 4, line 40) in a proxy environment (col. 4, line 40 – col. 6, line 40) that comprises the engine (col. 6, line 40 – col. 7, line 67; col. 9, line 40 – col. 12, line 52). At the time the invention was made, one of ordinary skill in the art would have added XSLT in order to make web documents usable components (col. 3, lines 25-35).

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. They regard further teachings on protocol conversion, XML, and mobile environments.
